

Adaptive Dance Covid-19 Social Story

DEVON CARNEY
ARTISTIC DIRECTOR

Coming and going to dance at Kansas City Ballet School will be a little different this year, but this will help keep me safe.

I will say goodbye to my family at the front door.

I know they will be waiting for me here when I'm finished dancing.

I will stop to sanitize my hands and may need to get my temperature taken too.

If I need my temperature taken, an adult will place a thermometer next to my forehead to check my temperature.

I will do my best to hold still while my temperature is taken.

A teacher walks with me up a long staircase to my dance studio.

I go into the studio with my teacher and get ready for my class!

I do my best to give my teachers and my friends space in dance class. I keep my hands to myself in dance class.

I get to choose my own square to dance in while we warm up our bodies. This is my special spot!

I need to do my best to keep my mask on during dance class. My mask helps keep me, my teachers and my friends safe by stopping the spread of germs.

When my dance class is finished, I walk downstairs with a teacher.

I need to be careful on the stairs as I go down because the stairs can be slippery sometimes.

I use walking feet to the front door and wait with my teacher.

When I see my family outside, I can walk over to them and say goodbye to my teacher.

I need to be careful to stay on the bricks or the sidewalk by the front door to keep my body safe from cars driving by.
