**Kansas City Ballet  
Opens 2023-2024 Season with  
North American Premiere of  
*Jekyll & Hyde*  
Performances October 13 - 22  
at the Kauffman Center for the Performing Arts**

KANSAS CITY, MO (Sept. 14, 2023) — Kansas City Ballet's 2023-2024 season opens with the highly anticipated North American premiere of *Jekyll & Hyde*, choreographed by Val Caniparoli, and accompanied by Kansas City Symphony performing the haunting original score conducted and arranged by Kansas City Ballet

Kansas City Ballet Presents *Jekyll & Hyde* Oct. 13- 22 at the Kauffman Center for the Performing Arts 1

Music Director **Ramona Pansegrau**. Val Caniparoli's choreography had its world premiere at the Finnish National Ballet in 2020.

Choreographer Val Caniparoli shared: "I'm so excited that Kansas City Ballet will present the North American Premiere of *Jekyll & Hyde*. Bringing this ballet home to where it all began in workshops before the pandemic and after its premiere with Finnish National Ballet, has been a dream. To continue with my relationship with this world class establishment and these amazing artists in the studio has been a blast and I can't wait for you to see them bring the world of *Jekyll & Hyde* to life onstage."

This North American premiere of Val Caniparoli's newest ballet focuses on the eternal struggle of good versus evil as it plays out within one man. The ballet's narrative is framed as a feverish hallucination of Robert Louis Stevenson, as he imagines the tale of Dr. Jekyll and Mr. Hyde. As the story progresses, the lines between reality and fiction become blurred with Stevenson realizing the dark side of human nature that he has unleashed into the world through his writing. Parental discretion is advised.

Kansas City Ballet Music Director and *Jekyll & Hyde* musical editor Ramona Pansegrau shared some of the aspects of the production. "The music of *Jekyll and Hyde* is built around Polish composers. Penderecki's 3<sup>rd</sup> symphony is a major component, with music by Gorecki used for smaller linking sections. The psychological aspect of both Hyde and Jekyll's minds are explored with the change of instrumentation in the works." She continued, "The addition of music by Wieniawski and Kilar portray the more intimate, normal aspects of Jekyll's life, whereas the complex and fantastical music of Penderecki and Gorecki portray the cacophony and delusions buried in Hyde's twisted mind. Three centuries of Polish music capture the nature of both men."

Devon Carney, Kansas City Ballet artistic director stated: "I'm honored that our company was chosen in 2019 by Val, this internationally renowned choreographer, to begin the process of bringing his vision to life prior to it ever being performed in Finland. He spent time with some of our Company artists years ago shaping his characters and choreography. To see the final product actually be the genesis of the character roles that came from his work with our dancers. We were the company that he trusted and wanted to work with in this way.

"We have a great team here in Kansas City that Val trusts. That trust has been built up over time and he knows we're going to do a great job of putting his work on stage and of making it look good. The fact that the production has in its DNA the choreography work done with our dancers but also the incredible work from Ramona on the score. She and Val collaborated on the music choices for years. What she has done is an incredible arrangement of music. It's *exactly* what it should be. This is a significant moment in her career. As an artistic director and as an organization, I'm really happy that this is happening for her, here."

[\*Strange Case of Dr. Jekyll and Mr. Hyde\*](#) is a novella written by Scottish author Robert Louis Stevenson, first published in 1886. The ballet's story follows Dr. Jekyll's pursuit of unleashing the hidden underbelly of the human experience and his descent into his

evil alter ego, Mr. Hyde. The ballet features themes of duality, temptation, and the struggle between good and evil, and explores the consequences of Dr. Jekyll's experiments.
